DETAILED ACTION

This office action is in response to the response to election requirement filed on 3/14/06

Election/Restrictions

1. Claims 1 and 19 generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 12-15 and 18, directed to the species I, III, IV, V and VI no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

2. Claims 1-27 are allowed.

With respect to claim 1, the following is an examiner's statement of reasons for allowance: the prior art of record neither discloses nor makes obvious the combination set forth in the independent claims, and especially does not show “*a field modification module proximate with the fuel pump and in communication with the controller to receive the control signal, the field modification module being configured to alter a magnetic field of the motor in response to the control signal thereby controlling the speed and torque of the fuel pump*”, in combination with the other claim limitations.

With respect to claim 19, the following is an examiner's statement of reasons for allowance: the prior art of record neither discloses nor makes obvious the combination set forth in the independent claims, and especially does not show “*a field modification module external to the motor and in communication with the controller to receive the control signal, the field*

modification module having a coil configured to receive the control signal to generate a flux through the fuel pump thereby controlling the speed and torque of the fuel pump", in combination with the other claim limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
